CONTRACHT

# Every job, on the record.

Partnership discussion | November 2026

# The work is documented. The transaction is fragmented.

Email · Estimate · Text message · Spreadsheet · Photos · Invoice · Payment

**Seven places. No single record.**

# One record from scope through final approval.

## Record

Partly built

# One workflow. Distinct responsibilities.

Property operator

**Decides on the work.**

Contractor

**Does the work.**

Financial provider

**Controls the money.**

Proposed role. No provider signed.

## An ordinary capital-improvement project, on the record.

# 4 of 5

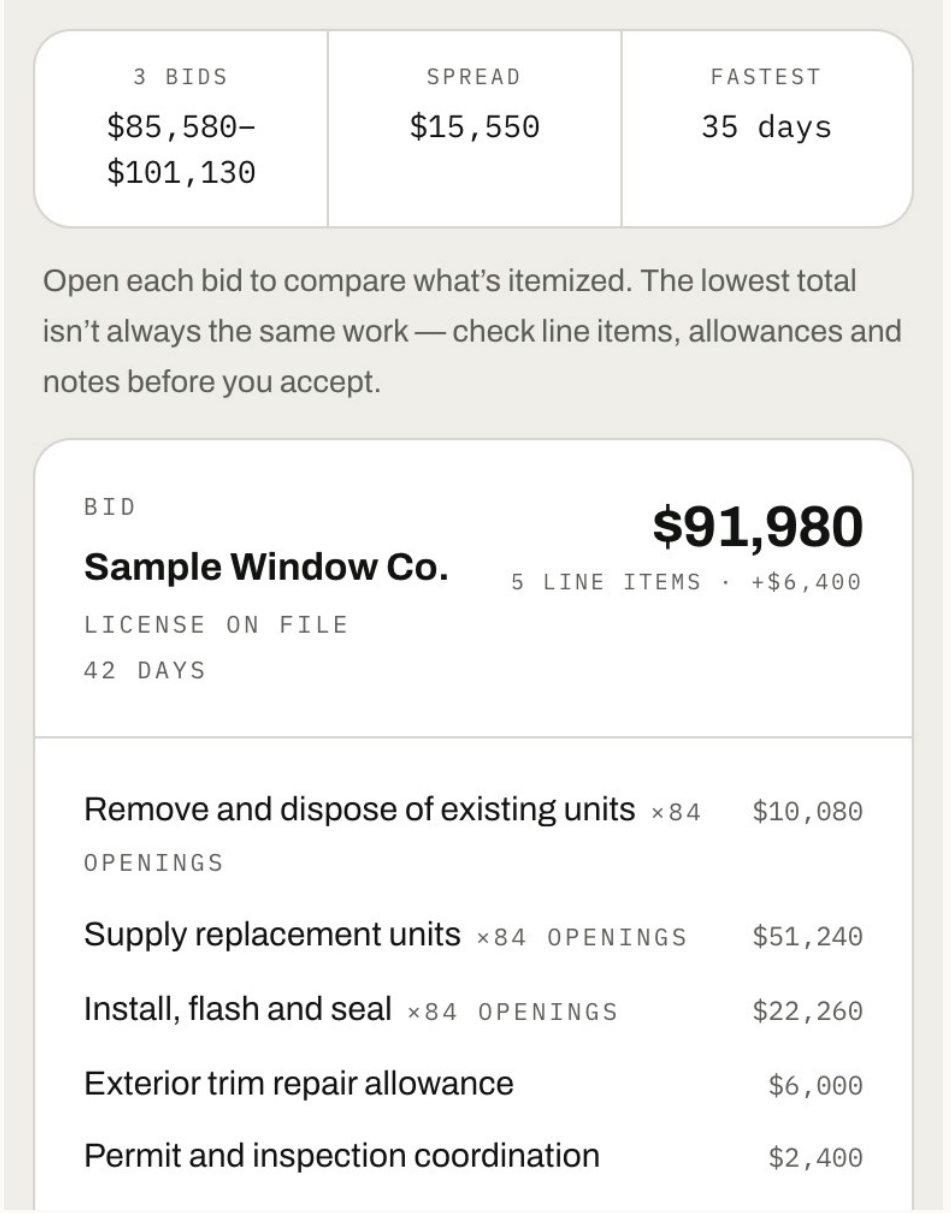

## The line stops at what is missing.

Illustrative example. All names, quantities, prices and dates are invented. No money moves.

# Built around the project record.

## This version of the application has not yet run on a production database.

Real screen. Sample data.

# The software coordinates. Authorized institutions control funds.

## Contracht does not hold, move or release money.

Neither funding model has had legal review.

# An opportunity to connect construction workflows with financial expertise.

# Clearer oversight.
# Fewer gaps.
# Better instructions.

Possible benefits, not measured results. No partnership commitments exist.

# Start with one real project.

**One operator.**
**One contractor.**
**One project.**

No money through Contracht.

# What would make this commercially viable?

**We ask for one candidate project and the right people to ask next.**

*One project. One complete record. A foundation worth testing.*
